Key Community Needs that your Business Intelligence(BI) System will support.

train new employees, inventory management for each job including the costs and estimated time constraints. These are just of few of the things that my Key Community Needs that my Business Intelligence(BI) System will support.

Construction -our main serivice is construction of the buildings themselves
Renovation-another service we offer is renovation of buildings and rooms
Estimation- a service we offer to help people and companies understand the cost of the project they wish to undertake.
